Reason for Allowance

1. Regarding claims 1-7, the prior art fails to teach or suggest a network switch for receiving and forwarding data packets that include header data containing address information, comprising a network processor for processing data, wherein the switch determines in the event that the intervention of the network processor is required causes storage of the resultant data in the store, allows the processor to process the resultant data to provide processed resultant data; and provides the resultant data for the packet after the completion of the processing of the resultant by the network processor, in combination with other limitations, as specified in the independent claim 1.

Regarding claims 8-10, the prior art fails to teach or suggest a network switch for receiving and forwarding data packets that include header data containing address information comprising a look-up engine and a network processor, wherein the look-up engine determines whether intervention of the network processor in respect of the packet is required and if so stores the resultant data for use by the network processor and performs a look-up in the database in respect of another packet while the network process performs processing in respect of the resultant data of the packet, in combination with other limitations, as specified in the independent claim 8.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
